

5 **SILVER-CONTAINING CATALYSTS, THE MANUFACTURE OF SUCH
 SILVER-CONTAINING CATALYSTS, AND THE USE THEREOF**

ABSTRACT

 A high activity and high selectivity silver catalyst
comprising silver and, optionally, one or more promoters
10 supported on a suitable support material having the form
of a shaped agglomerate. The structure of the shaped
agglomerate is that of a hollow cylinder having a
relatively small inside (bore) diameter. The catalyst is
made by providing the shaped material of a particular
15 geometry and incorporating the catalytic components
therein. The catalyst is useful in the epoxidation of
ethylene.
